The Atari 5200 SuperSystem, commonly known as the Atari 5200, is a home video game console that was introduced in 1982 by Atari Inc. as a higher-end complementary console for the popular Atari 2600. The 5200 was created to compete with the Intellivision, but wound up more directly competing with the ColecoVision shortly after its release. The 5200's internal hardware is almost identical that of Atari's 8-bit computers, although software is not directly compatible between the two systems. The 5200's controllers have
